Pipe Separator

PipeSeparator™ technology is a solution for separating water from oil of a well stream in a pipe, rather than in large tanks, this is an enabler for compact solutions and separation at subsea facilities. Equinor holds an extensive patent bundle related to the Pipe Separator technology.

Current areas of use:
Subsea fields
Low pressure production

Equinor offer:
Standard non-exclusive license agreement

If this technology is of interest to your business please contact Equinor Technology Transfer, ETT@Equinor.com

Please be advised that a license is subject to compliance with Equinor’s general conditions, policies and strategy.
