

4th quarter and full year result 2016

London, 7 February 2017

Eldar Sætre – President and Chief Executive Officer

FORWARD-LOOKING STATEMENTS

This presentation contains certain forward-looking statements that involve risks and uncertainties. In some cases, we use words such as "ambition", "continue", "could", "estimate", "expect", "believe", "focus", "likely", "may", "outlook", "plan", "strategy", "will", "guidance" and similar expressions to identify forward-looking statements. All statements other than statements of historical fact, including, among others, statements regarding plans and expectations with respect to market outlook and future economic projections and assumptions; Statoil's focus on capital discipline; expected annual organic production through 2017; projections and future impact related to efficiency programmes, including expectations regarding costs savings from the improvement programme; capital expenditure and exploration guidance for 2017; production guidance; Statoil's value over volume strategy; Statoil's plans with regard to its completed acquisition of 66% operated interest in the BM-S-8 offshore license in the Santos basin; organic capital expenditure for 2017; Statoil's intention to mature its portfolio; exploration and development activities, plans and expectations, including estimates regarding exploration activity levels; projected unit of production cost; equity production; planned maintenance and the effects thereof; impact of PSA effects; risks related to Statoil's production guidance; accounting decisions and policy judgments and the impact thereof; expected dividend payments, the scrip dividend programme and the timing thereof; estimated provisions and liabilities; the projected impact or timing of administrative or governmental rules, standards, decisions, standards or laws, including with respect to the deviation notice issued by the Norwegian tax authorities and future impact of legal proceedings are forward-looking statements. You should not place undue reliance on these forward-looking statements. Our actual results could differ materially from those anticipated in the forward-looking statements for many reasons.

These forward-looking statements reflect current views about future events and are, by their nature, subject to significant risks and uncertainties because they relate to events and depend on circumstances that will occur in the future. There are a number of factors that could cause actual results and developments to differ materially from those expressed or implied by these forward-looking statements, including levels of industry product supply, demand and pricing; price and availability of alternative fuels; currency exchange rate and interest rate fluctuations; the political and economic policies of Norway and other oil-producing countries; EU developments; general economic conditions; political and social stability and economic growth in relevant areas of the world; global political events and actions, including war, political hostilities and terrorism; economic sanctions, security breaches; changes or uncertainty in or non-compliance with laws and governmental regulations; the timing of bringing new fields on stream; an inability to exploit growth or investment opportunities; material differences from reserves estimates; unsuccessful drilling; an inability to find and develop reserves; ineffectiveness of crisis management systems; adverse changes in tax regimes; the development and use of new technology; geological or technical difficulties; operational problems; operator error; inadequate insurance coverage; the lack of necessary transportation infrastructure when a field is in a remote location and other transportation problems; the actions of competitors; the actions of field partners; the actions of governments (including the Norwegian state as majority shareholder); counterparty defaults; natural disasters and adverse weather conditions, climate change, and other changes to business conditions; an inability to attract and retain personnel; relevant governmental approvals; industrial actions by workers and other factors discussed elsewhere in this report. Additional information, including information on factors that may affect Statoil's business, is contained in Statoil's Annual Report on Form 20-F for the year ended December 31, 2015, filed with the U.S. Securities and Exchange Commission (and in particular, Section 5.1 thereof (Risk factors)) which can be found on Statoil's website at www.statoil.com.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot assure you that our future results, level of activity, performance or achievements will meet these expectations. Moreover, neither we nor any other person assumes responsibility for the accuracy and completeness of the forward-looking statements. Unless we are required by law to update these statements, we will not necessarily update any of these statements after the date of this report, either to make them conform to actual results or changes in our expectations.

Reinforcing safety measures

Serious incident frequency

Serious incidents per million work-hours

2016 | Strong improvements in a low price environment

Financial results

- Adjusted earnings: USD 4.1 billion – reflecting low prices
- NOI¹: USD 80 million – impacted by impairments
- Solid cash flow

Operational performance

- Strong production – above guiding
- High production efficiency – increased well capacity
- 93% reserve replacement ratio

Improvement programme

- USD 3.2 billion in annual efficiency gains
- Average BE @ USD 27/bbl for next generation portfolio²
- Organic capex reduced by USD 3 billion to 10.1

Illustration: Gullfaks B

1 Net operating income.

2 Statoil- and partner-operated projects, sanctioned since 2015 or planned for sanction, with start-up by 2022. Volume weighted.

4Q16 | Strong operational progress - high expensed exploration

Adjusted earnings:

Group¹

- Higher liquids prices, lower European gas prices
- High tax rate
- Strong cash flow

USD mill	Pre tax	After tax
4Q16	1,664	(40)
4Q15	1,778	185

D&P Norway

- Strong operational performance
- Highest production since 2012
- Lowest OPEX in a decade

Pre tax	After tax
1,972	552
2,008	630

D&P International

- Expensed exploration wells
- Extensive turnaround activity
- High value growth US offshore

Pre tax	After tax
(681)	(708)
(674)	(720)

MMP

- Strong gas marketing
- Good trading results
- Turnaround at Mongstad

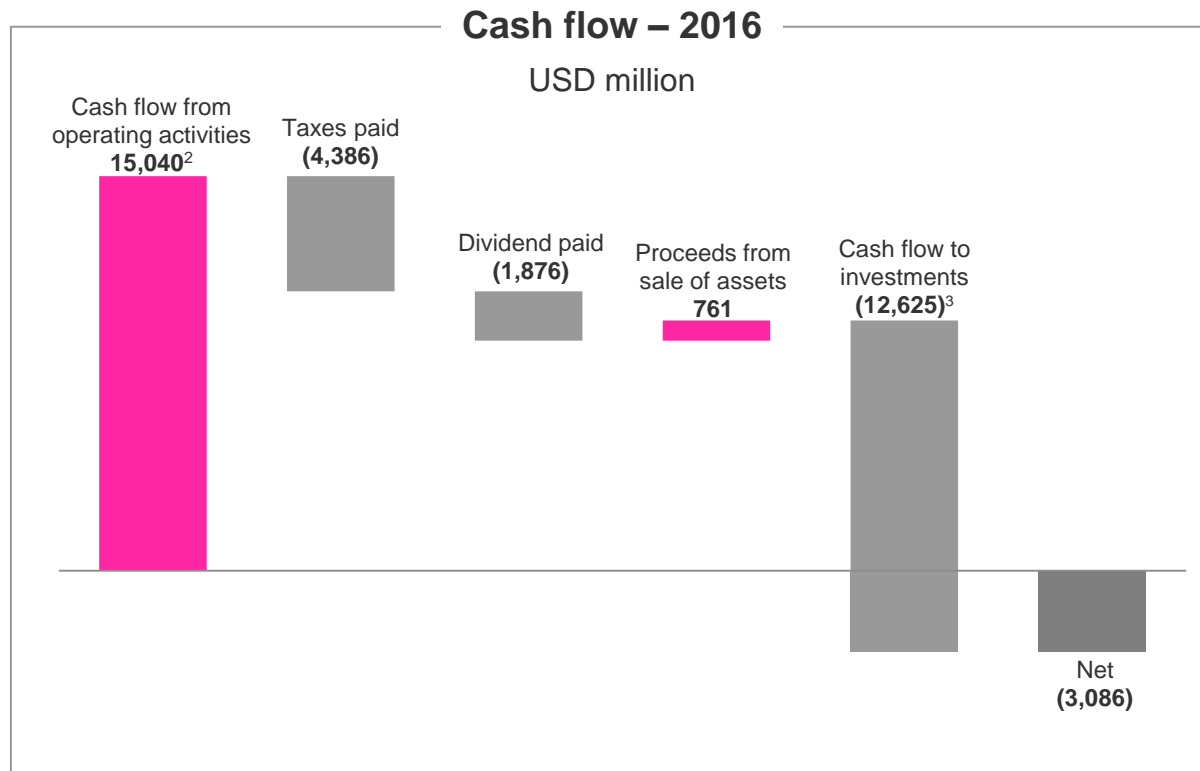

Pre tax	After tax
514	275
423	260

¹ Includes segments; D&P Norway, D&P International, MMP and Other.

2016 | Solid cash flow in low price environment

- USD 900 million cash flow positive in 4Q16¹
- Strict capital prioritisation and efficiency
 - Reduced capex by USD 3 billion compared to initial guiding
- Net debt ratio 35.6%
 - 4Q16 influenced by acquisition of BM-S-8, currency, impairments and working capital

1 Cash flow after tax, dividend and organic investments.

2 Income before tax (2557) + Non-cash adjustments (7334).

3 Cash flow to investments includes financial investment with cash impact of USD 541 million for the initial 11.93% in Lundin Petroleum.

Delivering above target – raising the bar

From programme to continuous improvement

USD billion

Forward impact from improvement programme

- Johan Sverdrup
- Johan Castberg
- Peregrino II

Continuous improvement

- LEAN operations
- Simplification, standardisation and industrialisation
- Technology, innovation and digitalisation

1 Annual continuous improvement from 2017.

2 Realisation of estimated facility effects compared to 2013 baseline.

Investing in next generation portfolio

Continuing
improvements

¹ Statoil- and partner-operated projects, sanctioned since 2015 or planned for sanction, with start-up by 2022. Volume weighted.

² Internal rate of return at project sanction assuming USD 70/bbl.

Building a profitable new energy business

Industrial approach

- Leverage core competence
- Scale & technology reduce costs
- Access to long-term projects

Value driven

- From subsidies to markets
- 9-11% return range (real)
- Cash flow resilience

Growth opportunities

- 15-20% of capex in 2030²
- Offshore wind and other options
- Low-carbon solutions

¹ Indicative for offshore wind projects.

² Indicative, based on potential future corporate portfolio.

Developing a distinct and competitive portfolio

Norwegian continental shelf

Build on unique position

- Highly cost competitive
- Attractive project pipeline
- Exploration potential

International oil & gas

Deepen core areas

- Enhance Brazil portfolio
- Flexible US position
- New growth options

High value,
low carbon

Midstream and marketing

Access premium markets

- Flow assurance
- Asset backed trading
- Capital light

New energy solutions

Industrial approach

- Offshore wind focus
- Low-carbon solutions
- Ventures, R&D

Capitalising on high value opportunities

Next generation portfolio

- Transformed costs, USD 27/bbl break-even
- Cash flow growth
- Capturing the cycle

Financial capacity

- 2017 capex: ~ USD 11 bn¹
- FCF positive @ USD 50/bbl in 2017
- Maintaining dividend, USD 0.2201²

Sharpened strategy

- High value, low carbon
- Continuous improvement
- Commitment to financial discipline

¹ Based on USD/NOK exchange rate of 8.5

² Subject to approval at the Annual General Meeting (AGM).
