Supplier Declaration Guide

Statoil’s suppliers shall be made aware of Statoil’s principles for corporate integrity and social responsibility.

Hence, Statoil has prepared a Supplier Declaration reflecting these principles. The intention of this declaration is to increase awareness and improve transparency of corporate integrity and social responsibility in the supply chain.

Please find the enclosed Supplier Declaration, which you as a potential supplier to Statoil are requested to sign. By signing this document, you confirm that you fulfill the requirements in the Supplier Declaration. To the extent you are not able to provide supporting documentation with respect to fulfilment of the requirements, you confirm your willingness to start a process, upon our request, of documenting your compliance with the requirements and principles set forth in the Supplier Declaration.
