

# Mariner & Bressay

## Landmark offshore UK development projects

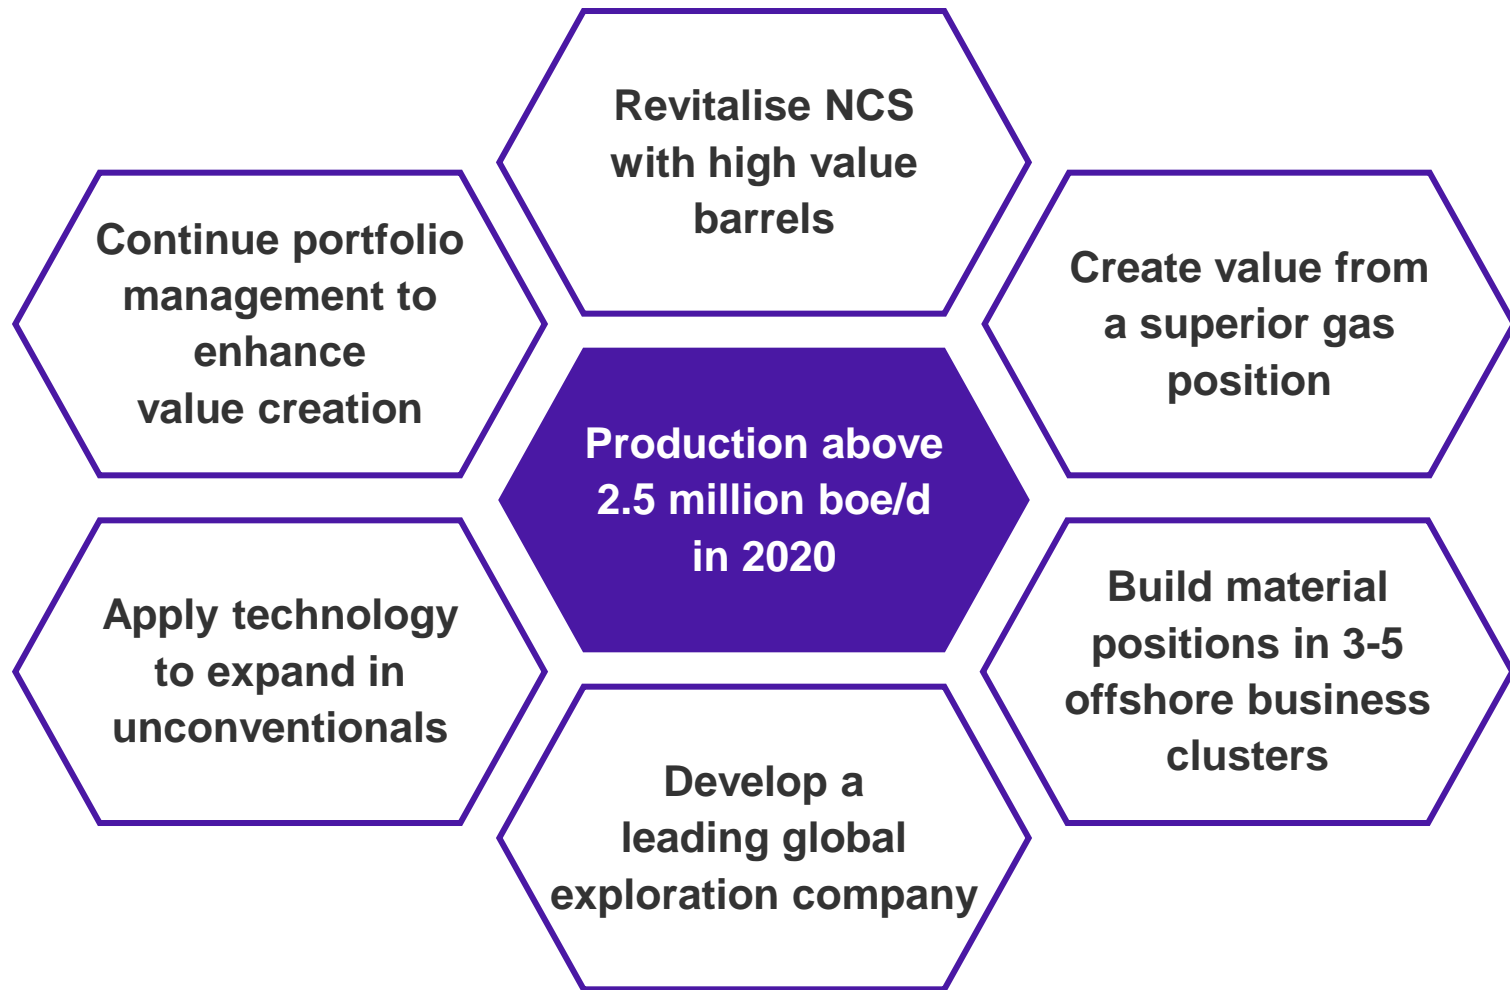

Statoil Media Briefing

Offshore Europe - 8 September 2011

Peter Mellbye, executive vice president

Development & Production International

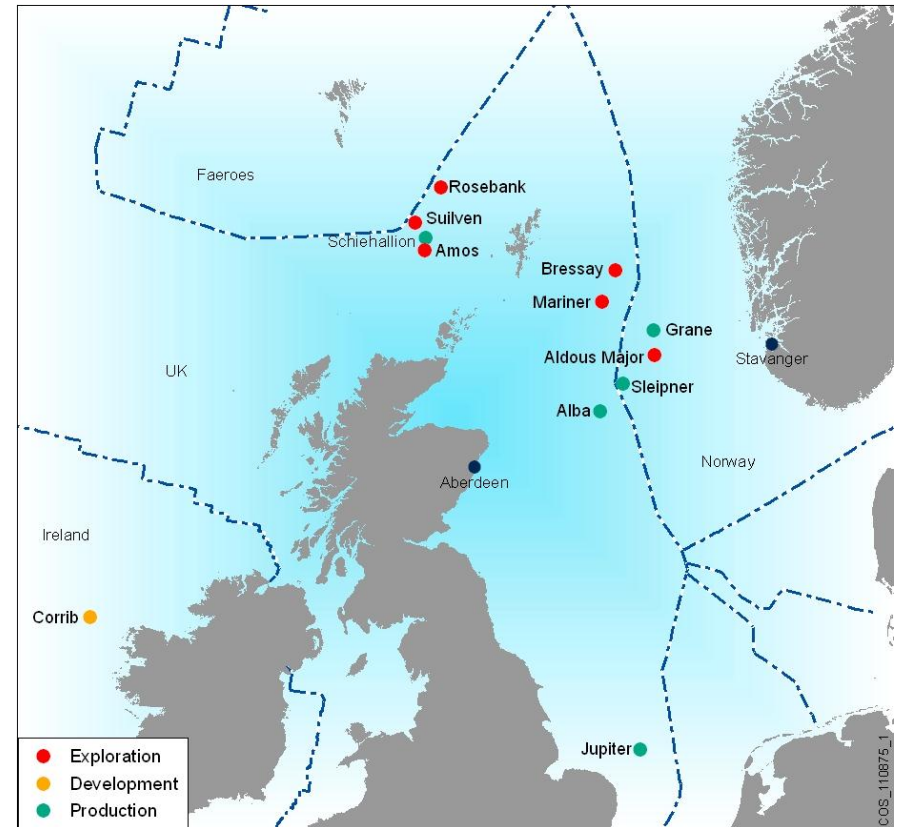

# A technology focused upstream strategy

# Adding value to the Aberdeen region

## The Mariner & Bressay fields

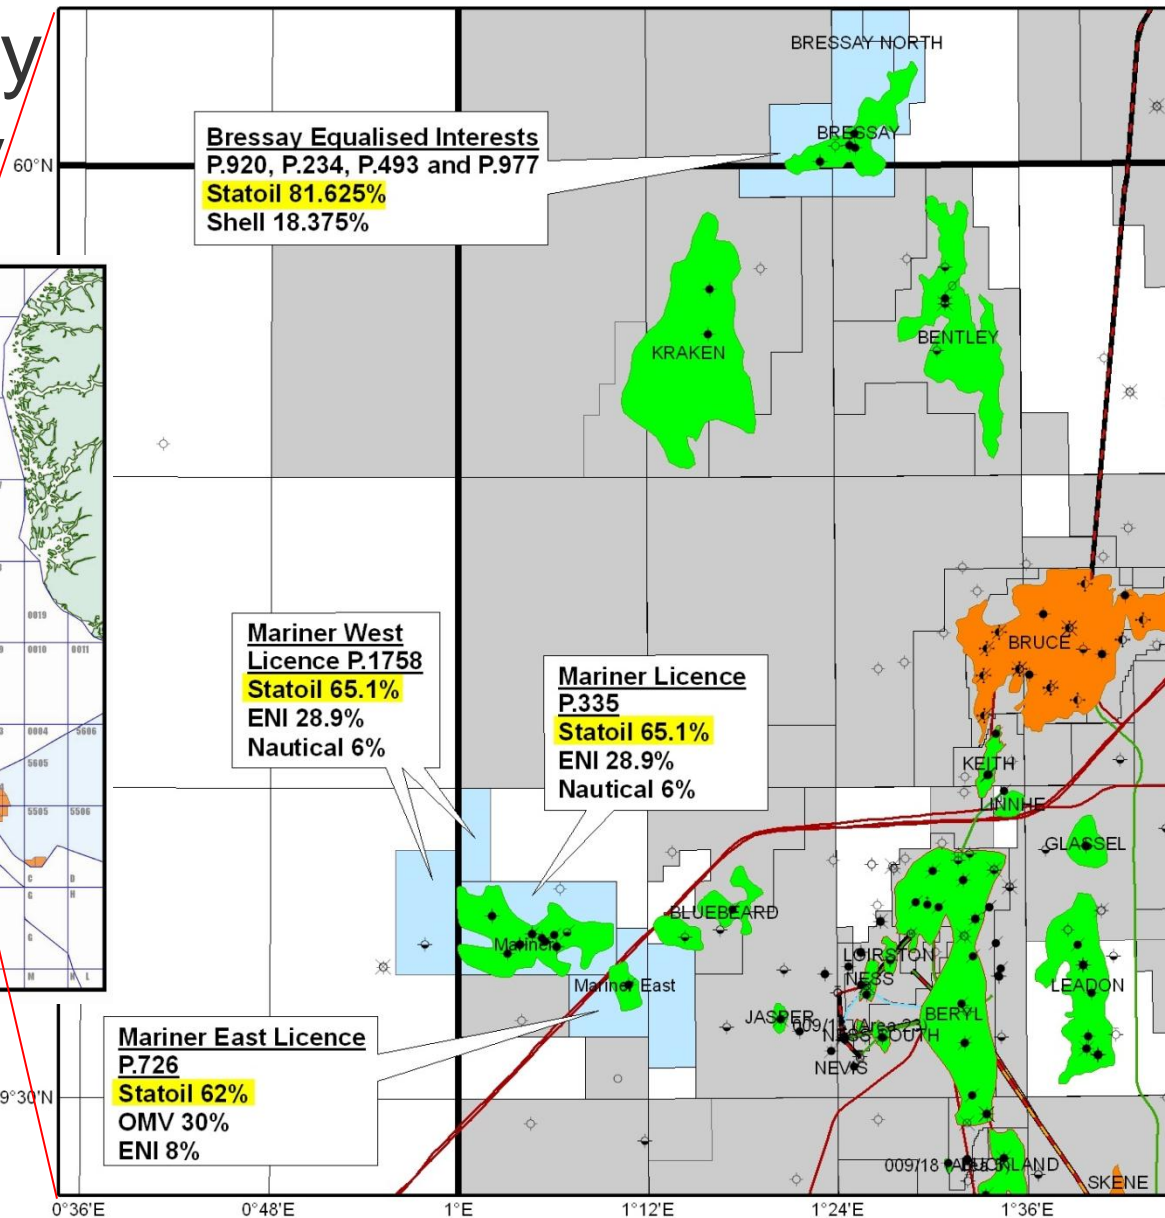

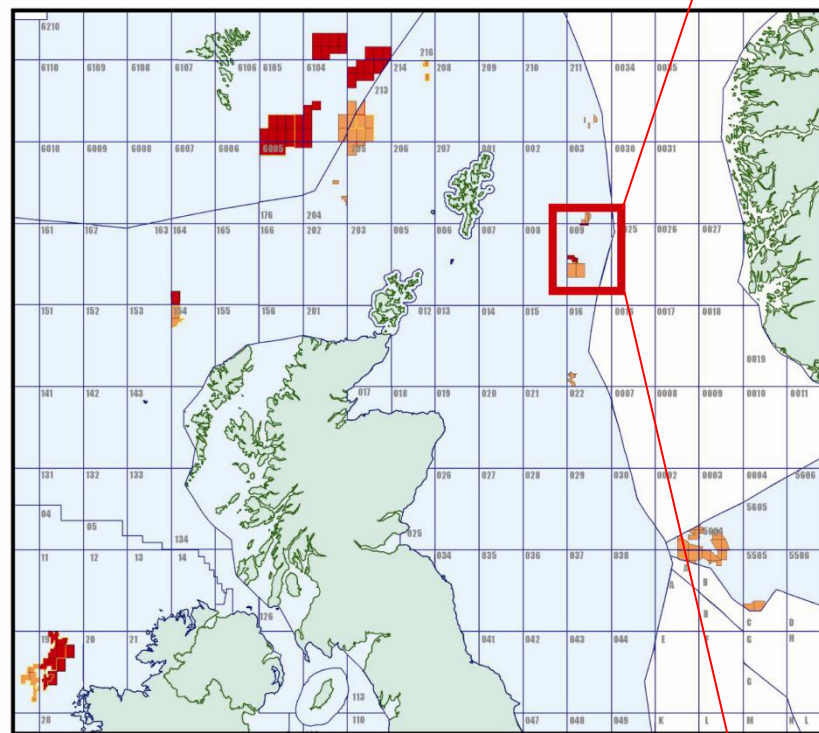

- Two stand-alone field developments
- Investments amounting to more than GBP 6 billion (both Mariner & Bressay)
- Establishment of a strong Statoil drilling and operations office in Aberdeen
- Yearly operating cost of GBP 150 million (Mariner & Bressay)
- Competence development and local growth

# Location and equity

## Mariner & Bressay

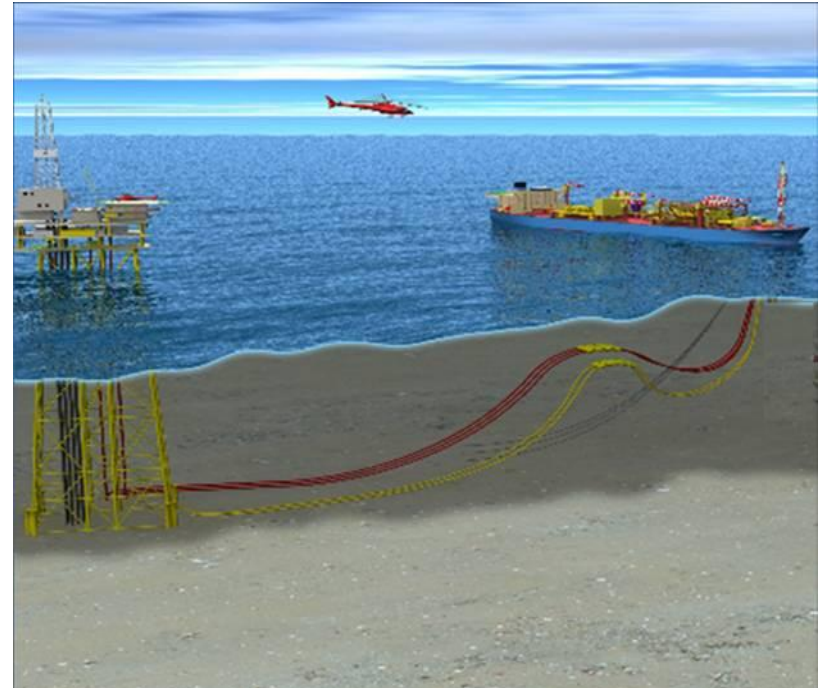

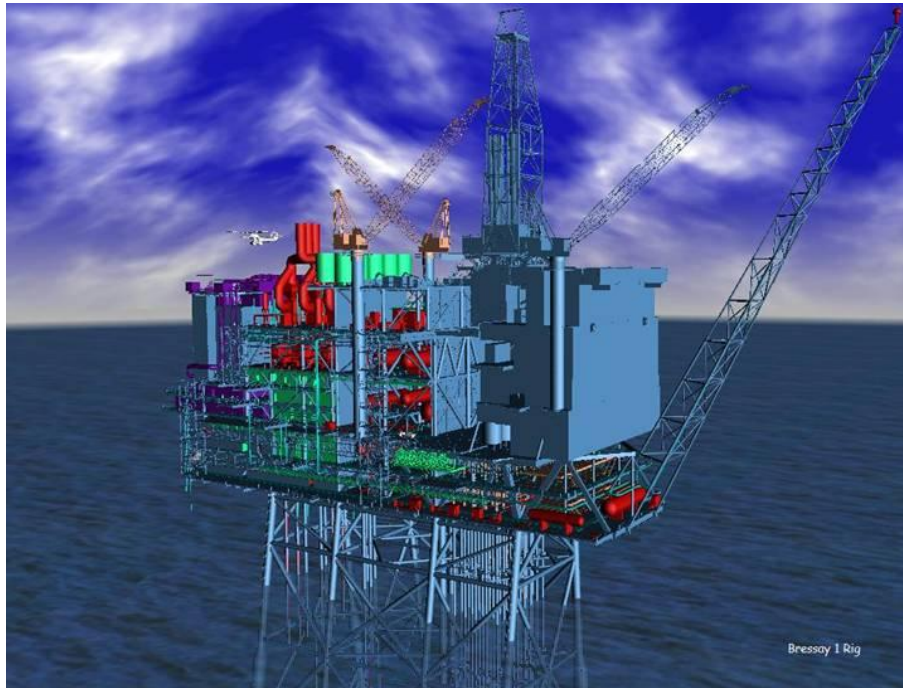

An aerial photograph of a large, complex offshore oil rig, the Mariner development concept. The rig is a multi-level structure with a prominent derrick and a large crane arm extending over the ocean. It is supported by a lattice of steel legs. In the background, two support vessels are visible on the water. The sky is blue with scattered clouds.

# The Mariner development concept

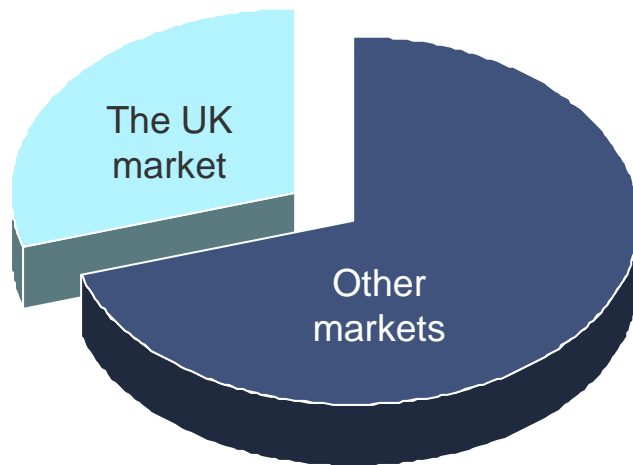

# Bressay is one year behind Mariner and with two alternative concepts

# The UK is one of Statoil's most important markets

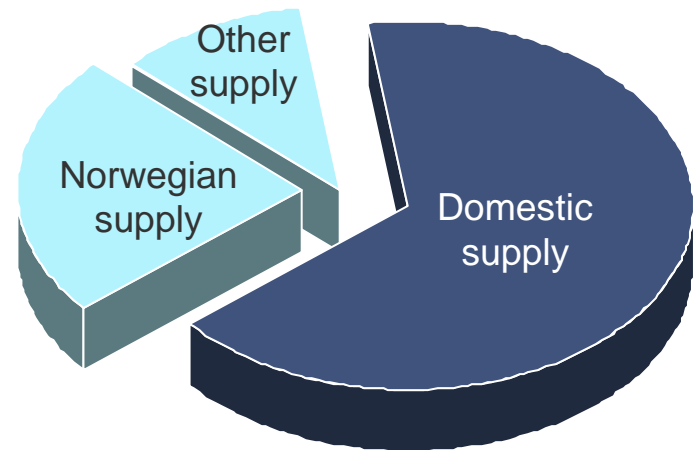

## Norwegian gas exports

The UK a key market

## The UK market

Norwegian gas is # 1 import source for the UK

Thank you

Peter Mellbye  
Executive Vice President, Development & Production  
International (DPI)
